DETAILED ACTION

Allowable Subject Matter

1. Claims 1- 23 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a magnetic memory device and a method of fabricating thereof with all exclusive limitations as recited in claims 1 and 14, comprising a magnetoresistive element at an intersection of and between a first and second conductive lines which are running at two different directions, a metal layer connected to the magnetoresistive element and having a side surface that partially coincides with a side surface of the magnetoresistive element; or comprising sequentially forming a metal layer, a magnetoresistive film, and first and second mask layers on a first insulating layer, patterning the second mask layer, patterning the first mask layer using the patterned second mask layer, patterning the magnetoresistive film using the patterned first mask layer to form a magnetoresistive element, and patterning the metal layer into a shape that separates cells and making a side surface of the metal layer partially coincident with a side surface of the magnetoresistive element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

U.S. Patent 6,746,875 to Okazawa et al. discloses a tunnel magnetoresistive memory (TMR) cell comprising a lower conductive film, a TMR film, and an upper conductive film, the lower conductive film having a plane shape different from those of the TMR and the upper conductive film.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu-Tu Ho whose telephone number is (571) 272-1778. The examiner can normally be reached on 6:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DAVID NELMS can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
